Residential | Commercial | Architectural

As proud distributors of the Breezway Altair® Louvre window systems we manufacture to your individual specifications for commercial or residential applications.

Benefits –

- Breezway Altair™ louvers can be cyclone rated and are the highest performing louvre window on the market
- Sealing up to 60% tighter than the minimum requirement for residential windows.
- Blades open almost horizontally, achieving maximum ventilation, perfect for places like walk in robes and bathrooms and laundries.
- The direction of airflow through the window is precisely controlled.
- On site measured to fit any space; tall, short, narrow or wide.
- Aluminium louver blades offer privacy and protection from heat gain, popular for patio enclosures and privacy screens.
- Windows can be left open in gentle rain.
- Blades can be cleaned from the inside, practical in multi-story applications.
- Stylish frames in a large range of colours.
- Come with a warranty and are made entirely from industrial strength plastics and corrosion resistant aluminium and stainless steel, for long life durability.
- The option of either 102mm or 152mm Blade Heights.
- Designed for 6mm Glass, 20% thicker than the standard.

Options –

- Glass options include obscure glass or the energy efficient “low e” glass.
- Aluminium blades come in a range of finishes, including those with a high performance extended warranty, for extreme conditions.
- Upgrade the security features with key locks.
- Add extra handles to split your louvre galleries into sections for more precise air flow. Low Profile Handles will avoid interruption with your blinds and ring pull handles for manually controlled highlights.
- Breezway Altair Powerlouvre™ is an award winning powered system, opening your window remotely from a switch or wired into your smart home automation system. This is popular with highlight window applications, allowing the hot air up high to escape.
- Flyscreens, security screens and bars are available.

louvre windows

Louvre windows allow maximum ventilation while enabling you to control the direction of the breeze coming in.
